

2020 winning submission

Hackathon Logo Contest

Are you artistic? Like graphic design, or a student currently in a graphic design program? MAGIC is looking for graphic design people to reimagine our Hackathon 2021 competition logo. Designs that work well as both full-color and single-color are preferred. Winning designer/design will receive a \$100 Amazon gift card and their work professionally published on our marketing materials and competition T-shirts. This is a great resume and portfolio builder for the winner of the contest.

Design requirements are as follows:

- Limit of 3 design options per artist entry
- Submit a PDF document with your design options. Include your designs in a full color and black & white version. Each entry should be a separate page in the PDF file.
- The submitted file name should be as follows: Hlogo_firstname_lastname.pdf

The winning submission will be required to submit a full file zip package including the following file types: ai, eps, png. The winner will also be required to submit graphic guidelines including font types used, color hex codes, etc

The contest is open now and submissions should be received for consideration no later than Monday, February 1, 2021. The winning logo will be determined on or around February 8, 2021 and the designer will be notified via email at that time.

The winning artist will be required to sign an Artist Release form and the submission will become the intellectual property of Mid-Atlantic Gigabit Innovation Collaboratory.

Please send questions and submissions to info@magicinc.org
